1. Introduction

1.1. Purpose

The purpose of this Software Requirements Specification (SRS) document is to describe the functional requirements of TimeCraft (Watch Service Coordination and Customization Platform) web application platform. This document outlines the system's features, user stories, and service coordination workflows, providing a clear reference for development of the application.

1.2. Scope

- Customize and purchase wrist watches and accessories
- Enforce accessory compatibility based on watch model
- Coordinate between customers and authorized/verified service partners
- Manage subscription-based service plans
- Maintain watch-specific service history and lifecycle records
- Provide notifications for orders, services, and subscriptions
- Support web-based user, technician, and admin interfaces

1.3. Intended Audience

Stakeholders, project developers, testers, UI/UX designers, system administrators, service partners/technicians, and customers using the platform.

1.4. Product Features

- User registration & login
- Watch browsing & customization
- Accessory compatibility enforcement
- Product purchase & order management
- Service selection & booking
- Subscription plan management
- Watch-specific dashboard
- Technician/service partner module
- Notification system
- Billing & payment processing
- Admin dashboard
- Service history
- Smart recommendations (accessories & plans)

1.5. Architecture Overview

- Frontend: HTML, CSS, JavaScript, Tailwind CSS
- Backend: Django using Python
- Database: SQLite3
- Development Tools: GitHub for version control, VisualStudio Code

1.6. Future Enhancements

- AI-based watch diagnostics and service recommendations based on usage and service history
- Eco-friendly options

1.8. User Stories for TimeCraft Platform

ID	User Role	Wants To	So That
US001	Customer	register	securely access the platform
US002	Customer	log in and manage my account	access services and purchases
US003	Customer	update my profile details	keep my information accurate
US004	Customer	browse watches by category	explore available products
US005	Customer	search and filter watches	find watches based on preferences
US006	Customer	view detailed watch information	make informed purchase decisions
US007	Customer	add watches or accessories to cart	purchase selected items
US008	Customer	place orders and complete checkout	confirm my purchases
US009	Customer	view order history	ser past purchases
US010	Customer	view compatible accessories	avoid incompatible purchases
US011	Customer	receive accessory recommendations	enhance watch usability
US012	Customer	book watch servicing	request maintenance or repair
US013	Customer	subscribe to service plans	avail periodic service benefits
US014	Customer	view watch-specific dashboard	manage services and subscriptions
US015	Technician / Service Partner	accept and manage service requests	perform assigned servicing tasks
US016	Technician / Service Partner	update service status and upload images	provide service transparency
US017	Admin	manage watches and accessories	maintain product catalog
US018	Admin	approve service partners	ensure trusted technicians
US019	Admin	view reports and analytics	monitor system performance
