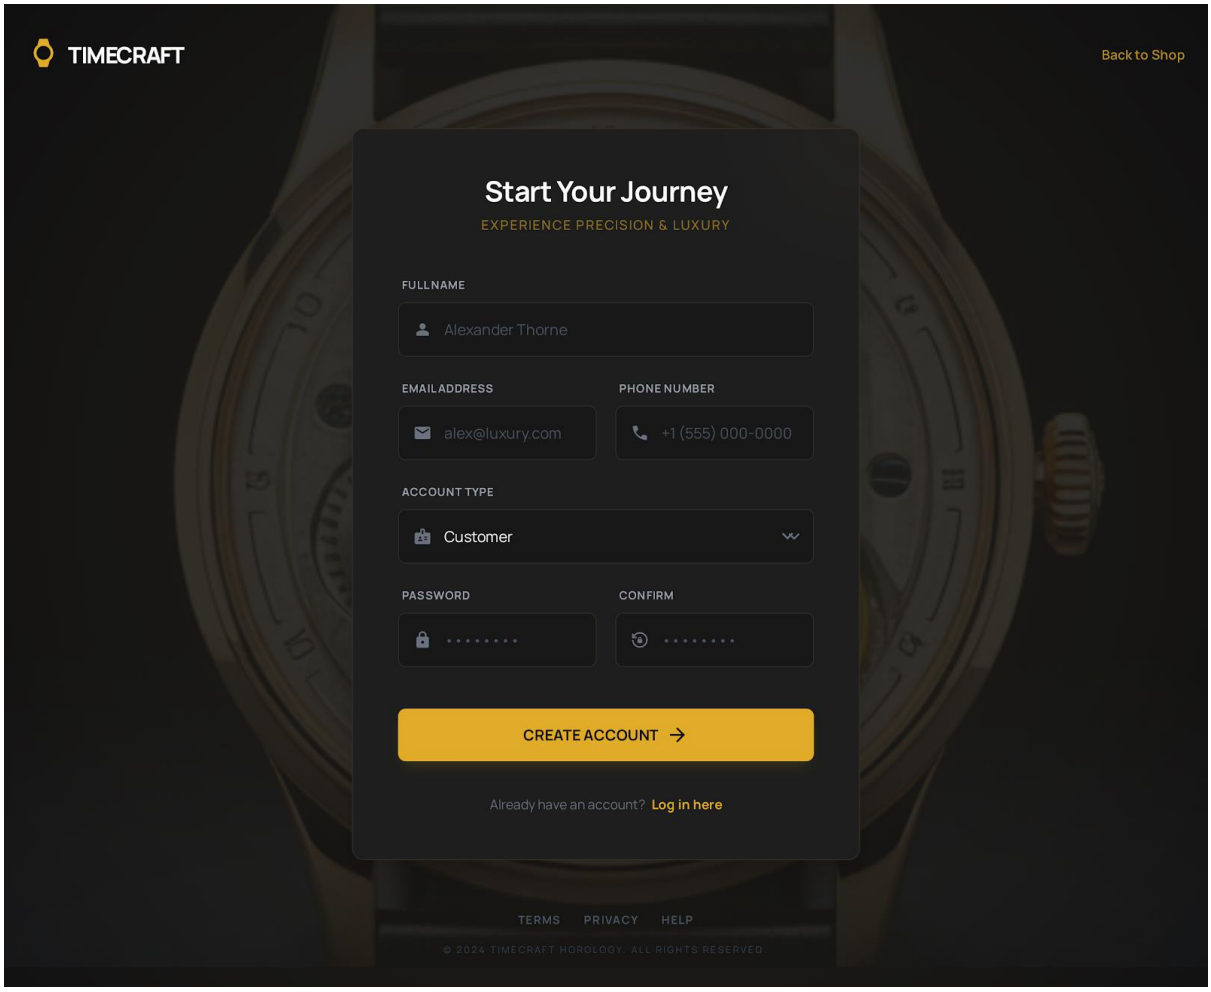
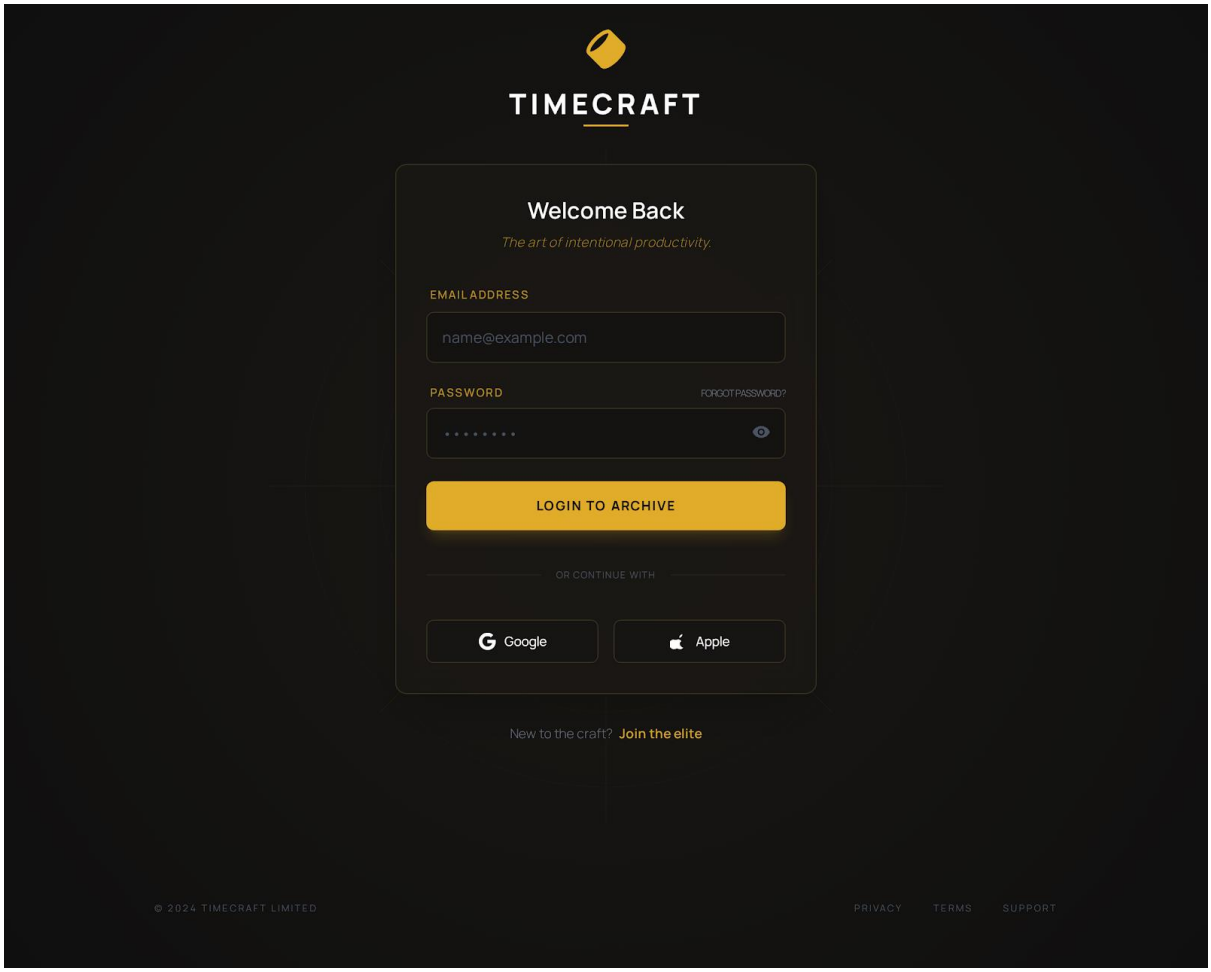
Registration Page



User Registration Page – Description

This screen allows new users to create an account on the TimeCraft platform. Users enter basic details such as name, email, phone number, account type, and password to register securely. Role selection enables role-based access within the system. The interface is designed to be simple, secure, and visually aligned with the luxury watch theme. Upon successful registration, users gain access to platform services.

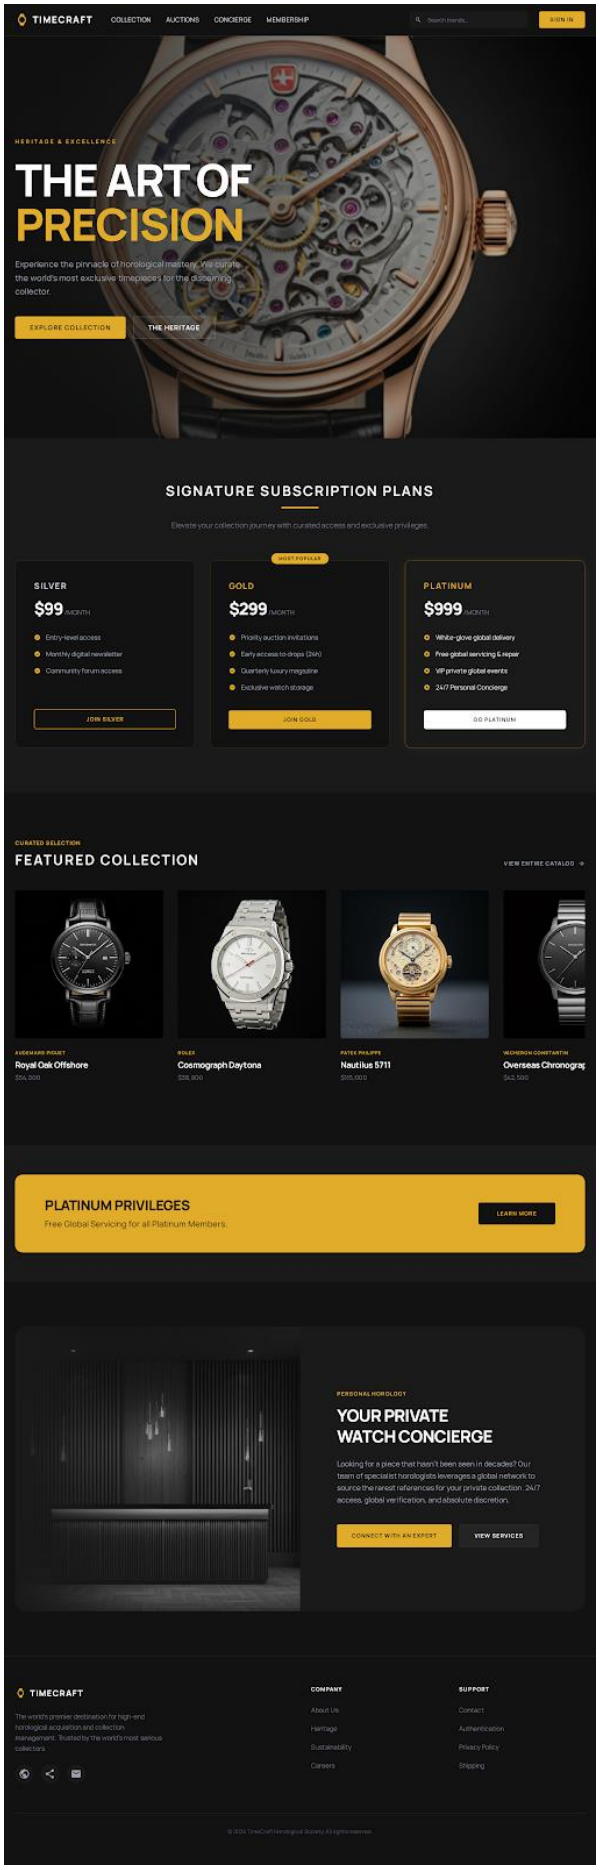
Login Page



User Login Page – Description

This screen allows registered users to securely access the TimeCraft platform. Users enter their email address and password to log in, with an option for password recovery if needed. The page also supports alternative authentication through Google and Apple for convenience. The design maintains a premium and minimal interface aligned with the brand identity. Successful login redirects users to their personalized dashboard.

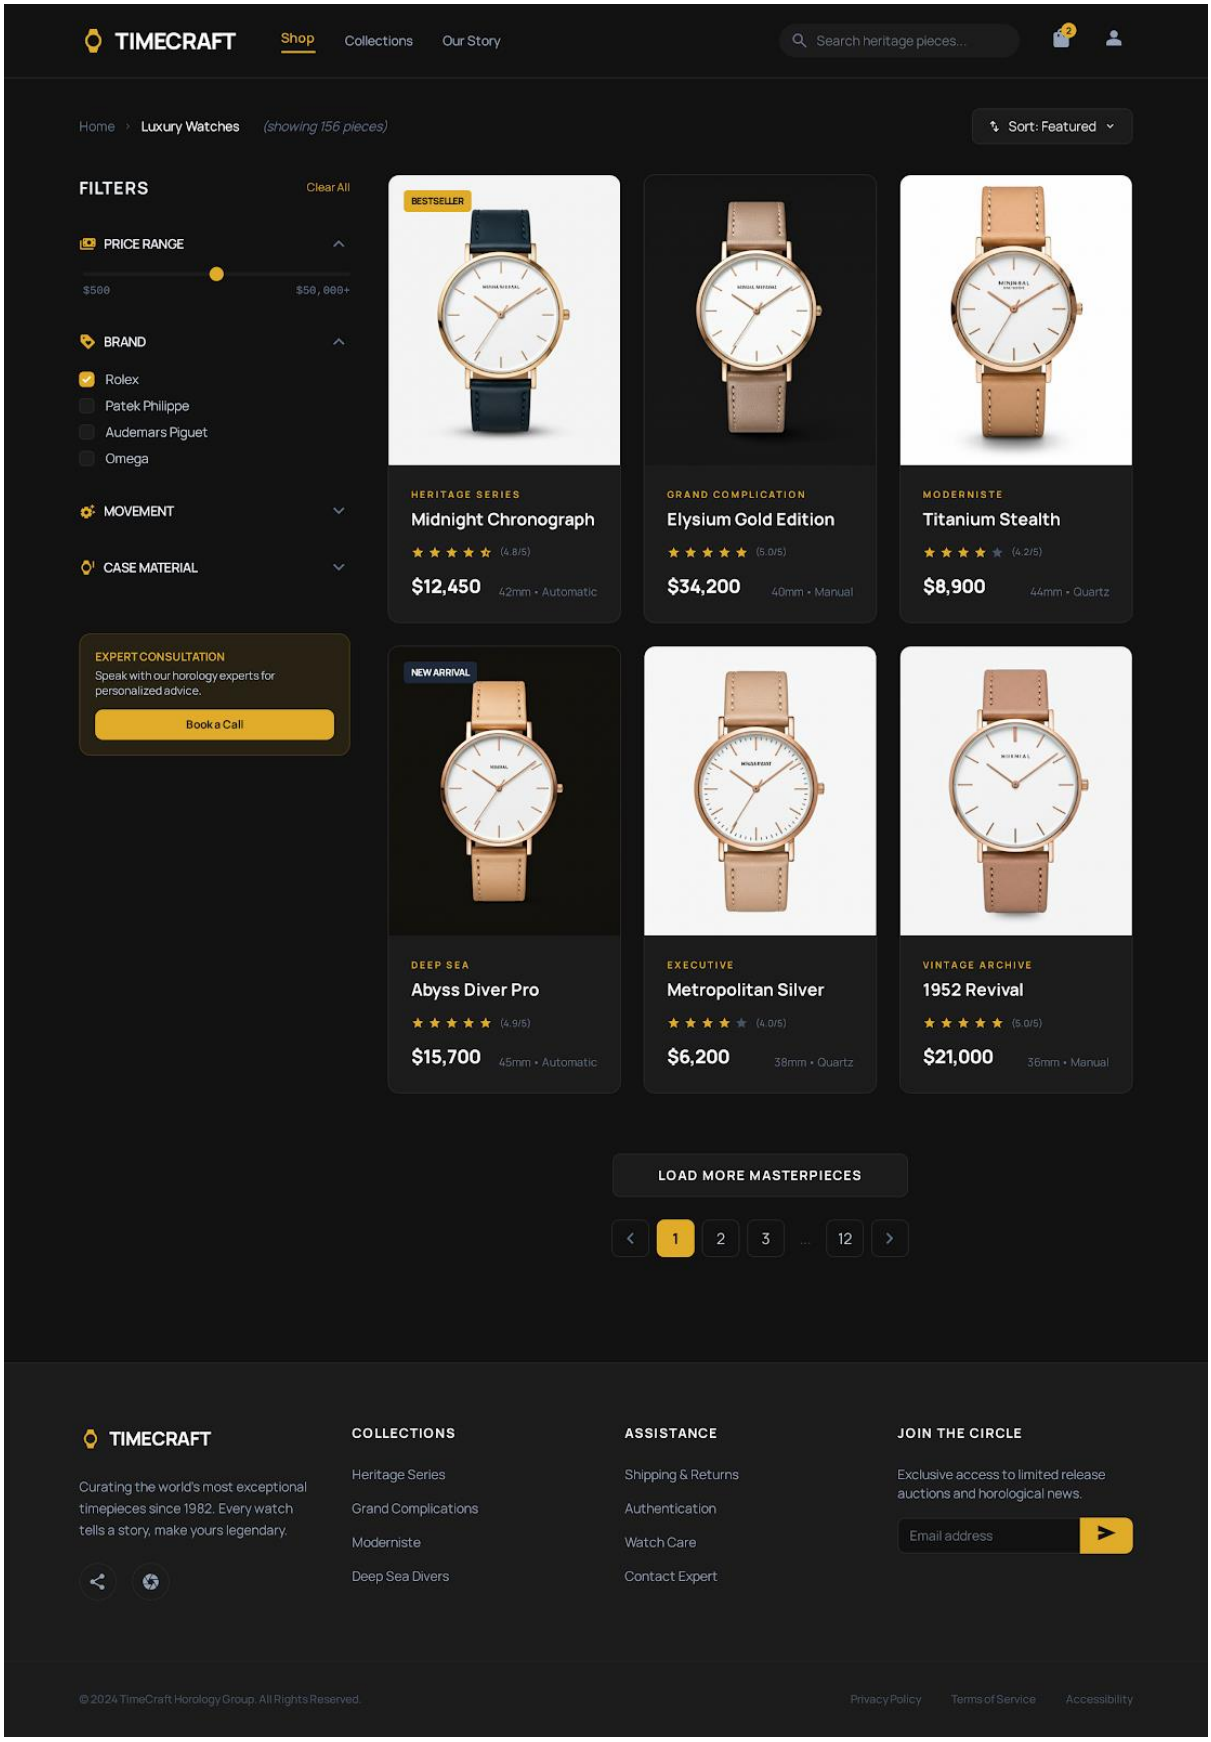
Home Page



Home Page – Description

This screen serves as the main landing page of the TimeCraft platform, showcasing the brand identity and premium watch collections. It provides navigation to key sections such as collections, auctions, concierge services, and memberships. Users can explore featured watches, view subscription plans, and access exclusive services. Promotional sections highlight premium privileges and personalized concierge offerings. The design emphasizes luxury aesthetics while ensuring intuitive navigation and product discovery.

Collection Page



Collection Page – Description

This screen displays the complete watch collection available on the TimeCraft platform. Users can browse products using filters such as price range, brand, movement type, and case material. Each product card provides essential details including watch name, price, rating, and specifications. Sorting and pagination options enhance usability for large inventories. The layout ensures efficient product discovery while maintaining a premium visual presentation.

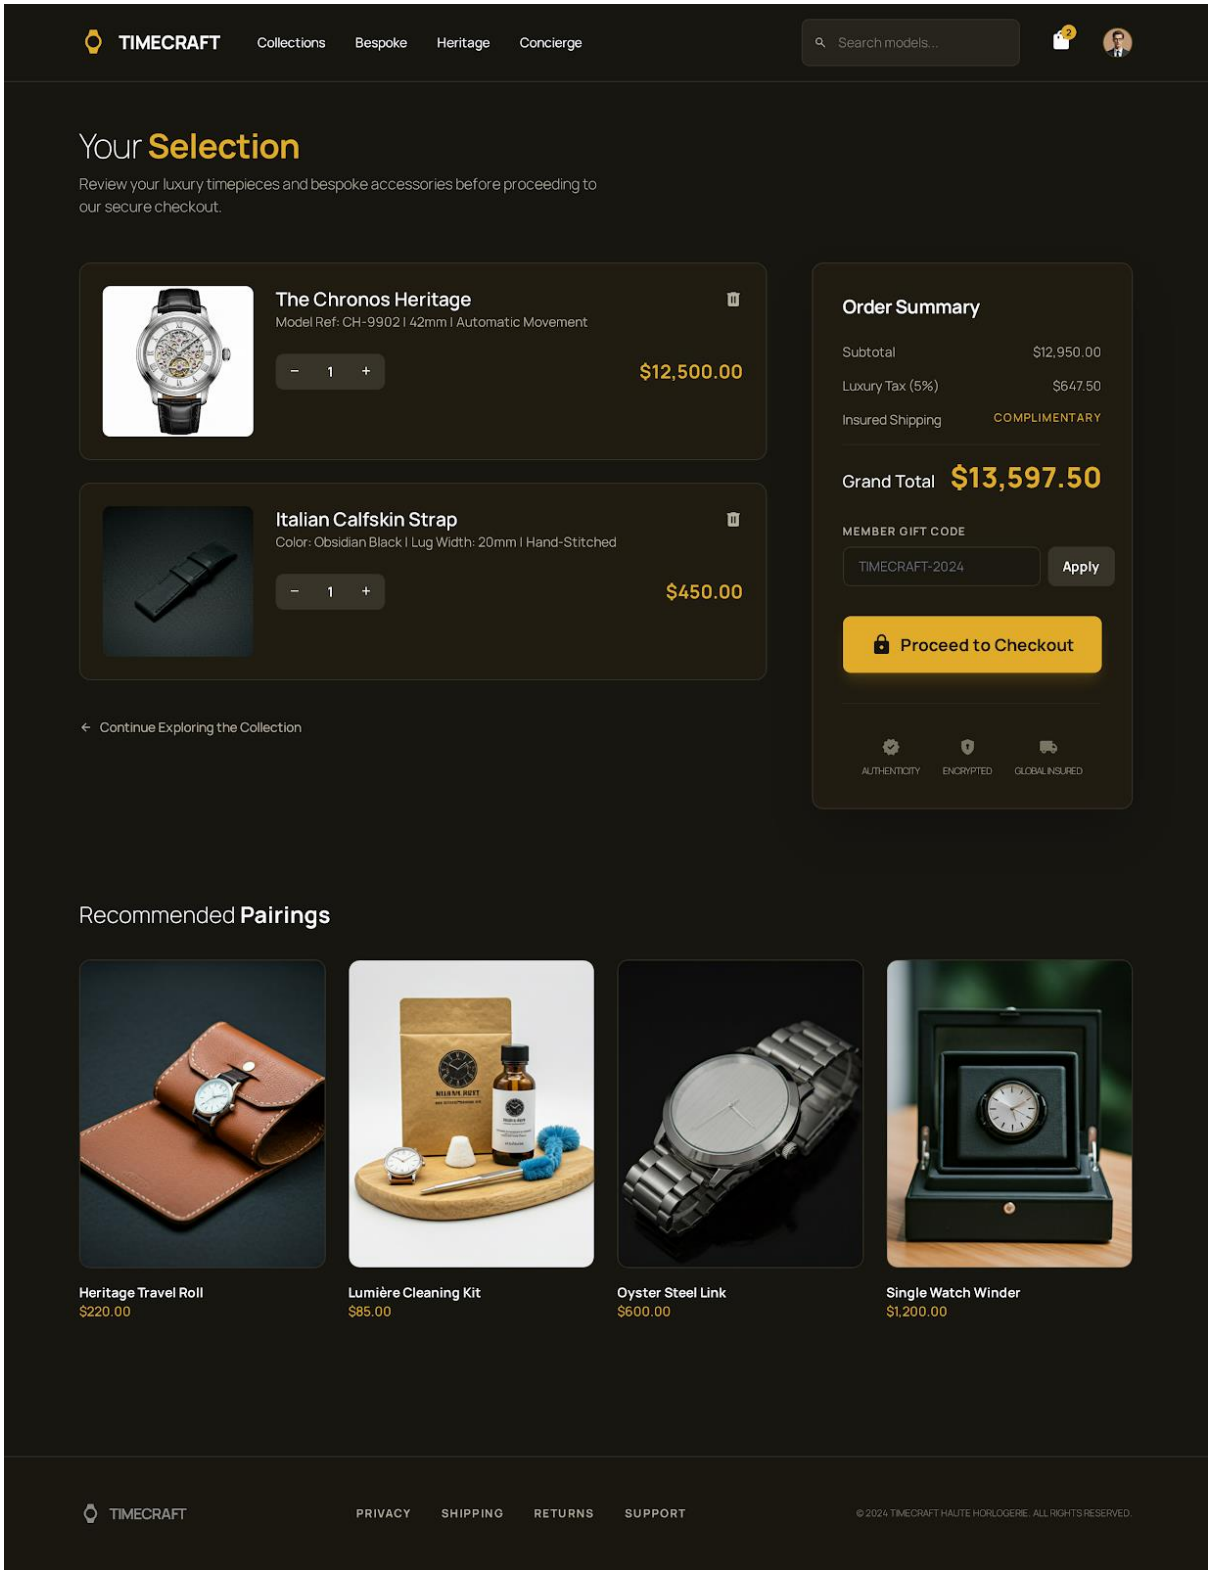
Search & Filter Page – Description

This screen allows users to search and refine watch results based on specific preferences. Advanced filters such as watch type, brand, price range, strap type, and compatibility help users narrow down selections efficiently. The page displays filtered results dynamically with sorting options for better comparison. Each product card shows key details including brand, model, price, and specifications. The design ensures quick product discovery while maintaining clarity and ease of navigation.

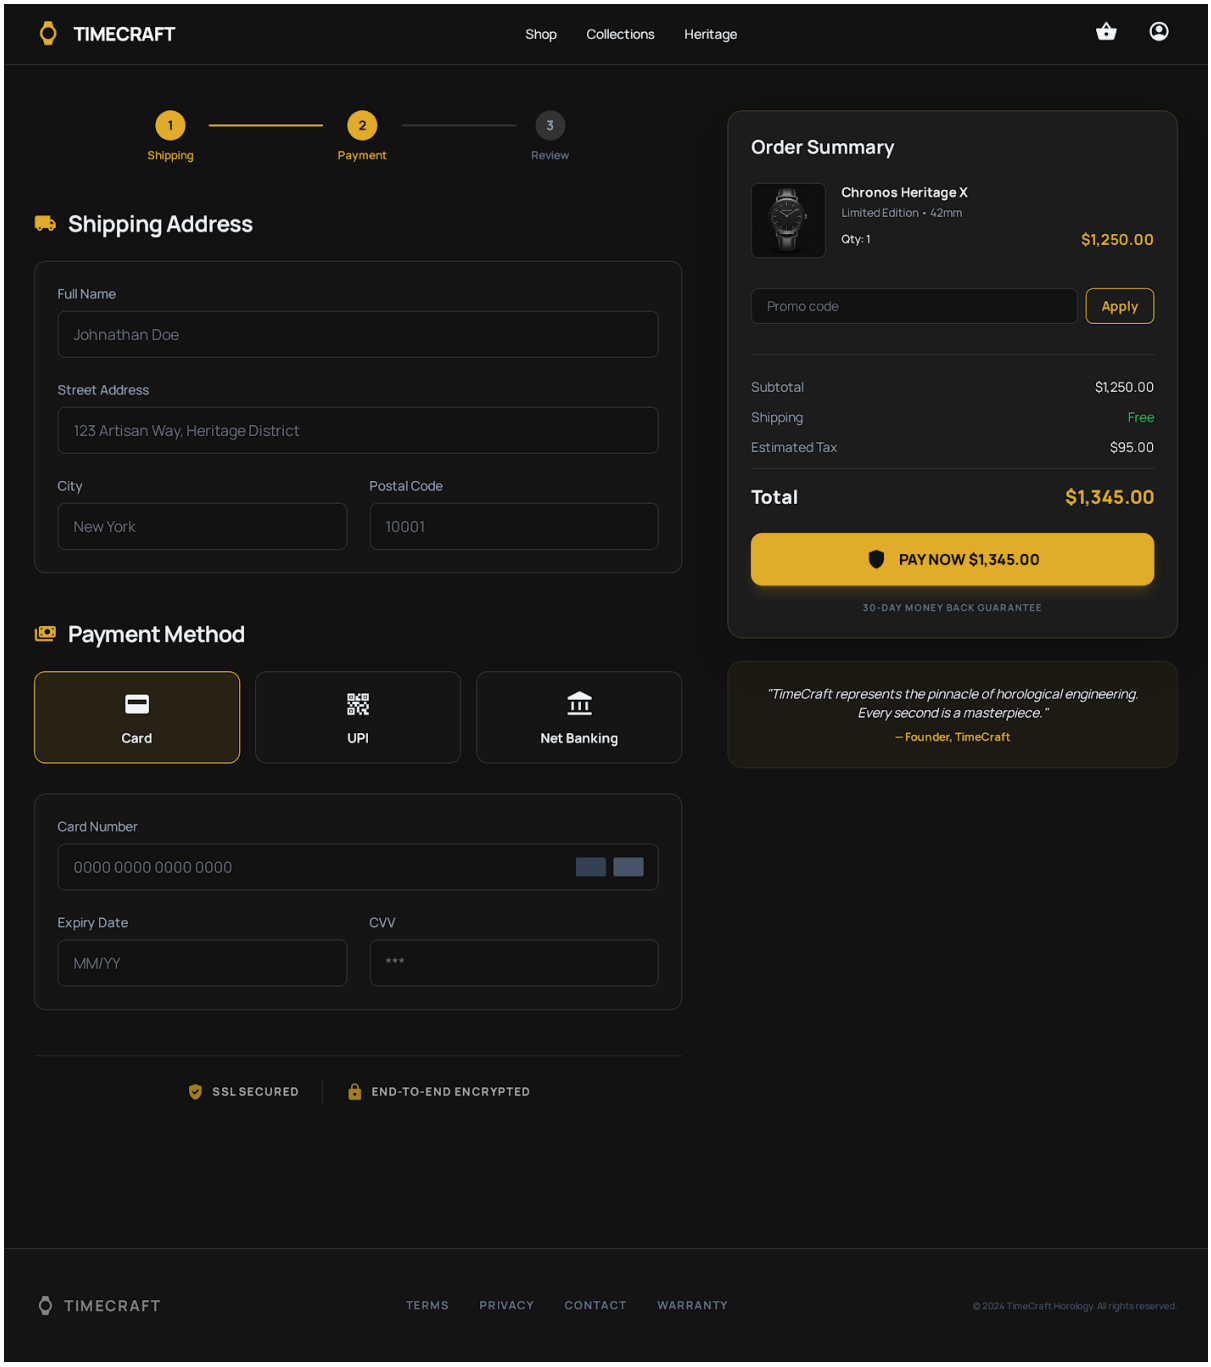
Shopping Cart Page



Description

This screen displays the items selected by the user for purchase, including watches and compatible accessories. Users can review product details, update quantities, or remove items before proceeding. An order summary panel shows subtotal, taxes, shipping details, and the final payable amount. Recommended accessory pairings are also suggested to enhance the purchase. The page ensures a clear and secure transition to the checkout process.

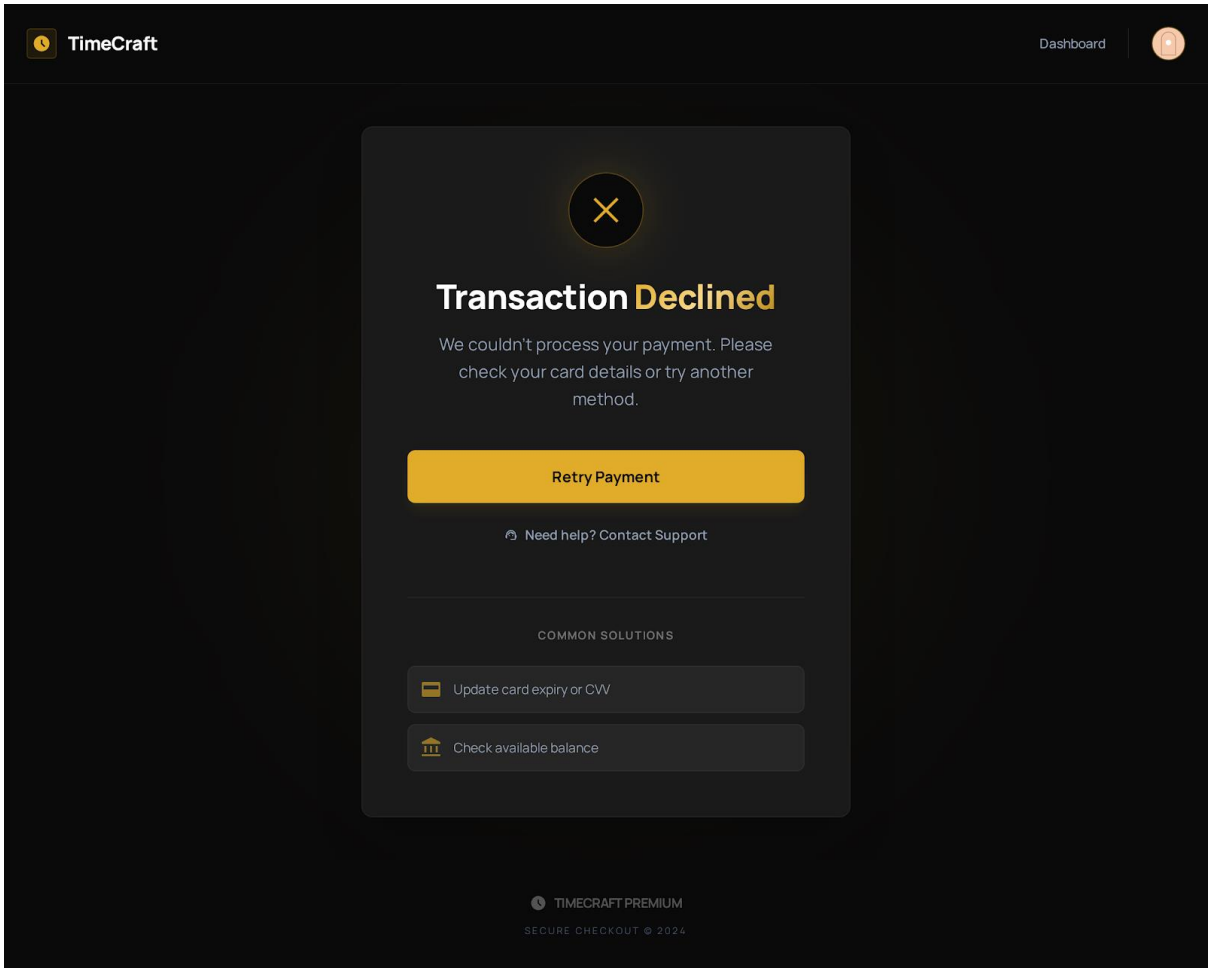
Checkout & Payment Page



Description

This screen enables users to complete their purchase by providing shipping and payment details. It includes address input fields, order summary, and multiple payment options such as card, UPI, and net banking. Users can review total cost, taxes, and applied offers before confirming payment. Security indicators ensure safe transaction processing. The page provides a structured and secure checkout experience.

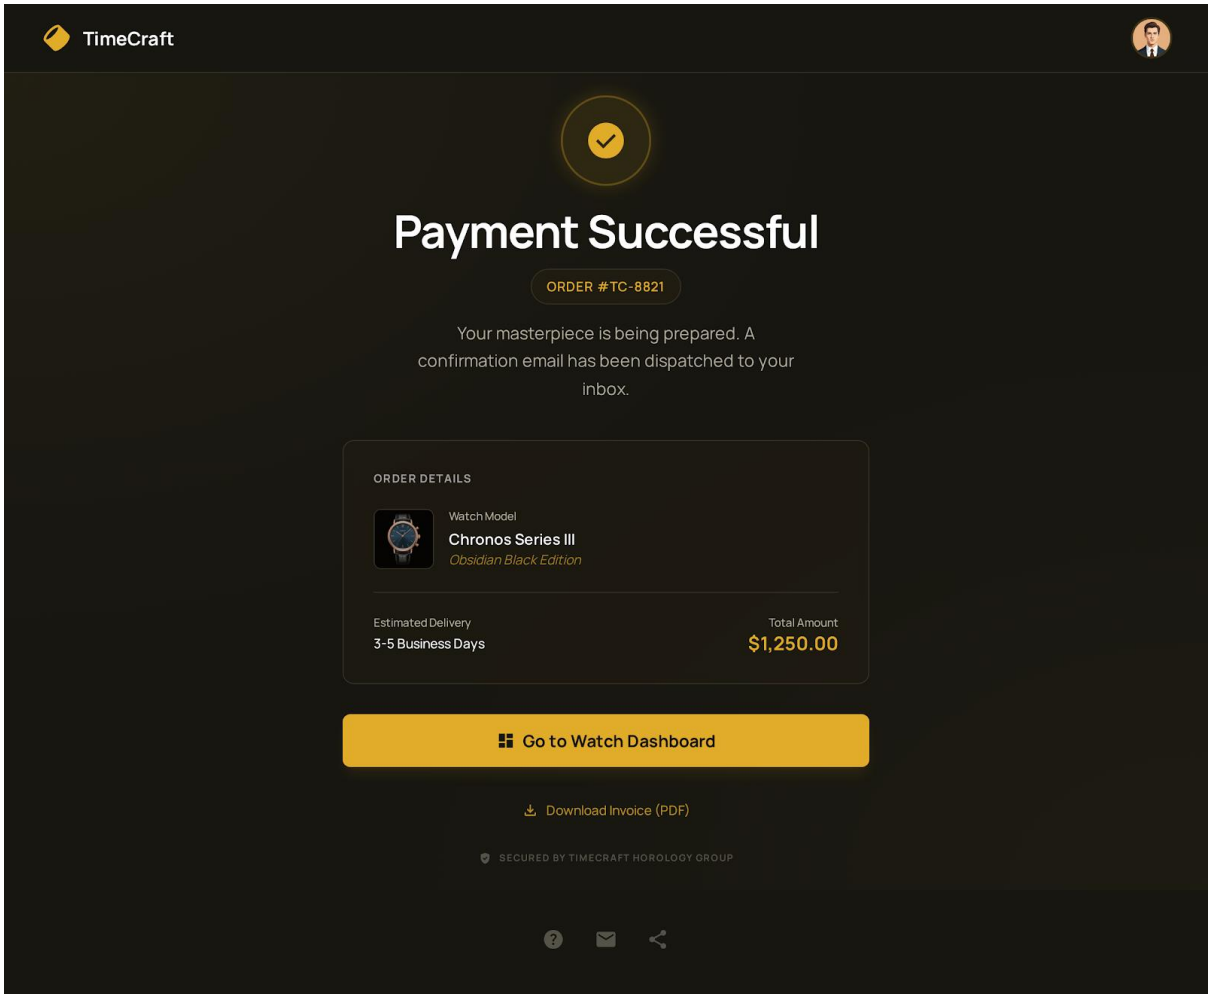
Payment Failed Page



Description

This screen is displayed when a payment transaction is unsuccessful. It informs the user about the failure and provides guidance to retry the payment. Users are prompted to verify card details or choose an alternative payment method. Support assistance is also available for further help. The design ensures clarity while maintaining trust and transparency in the transaction process.

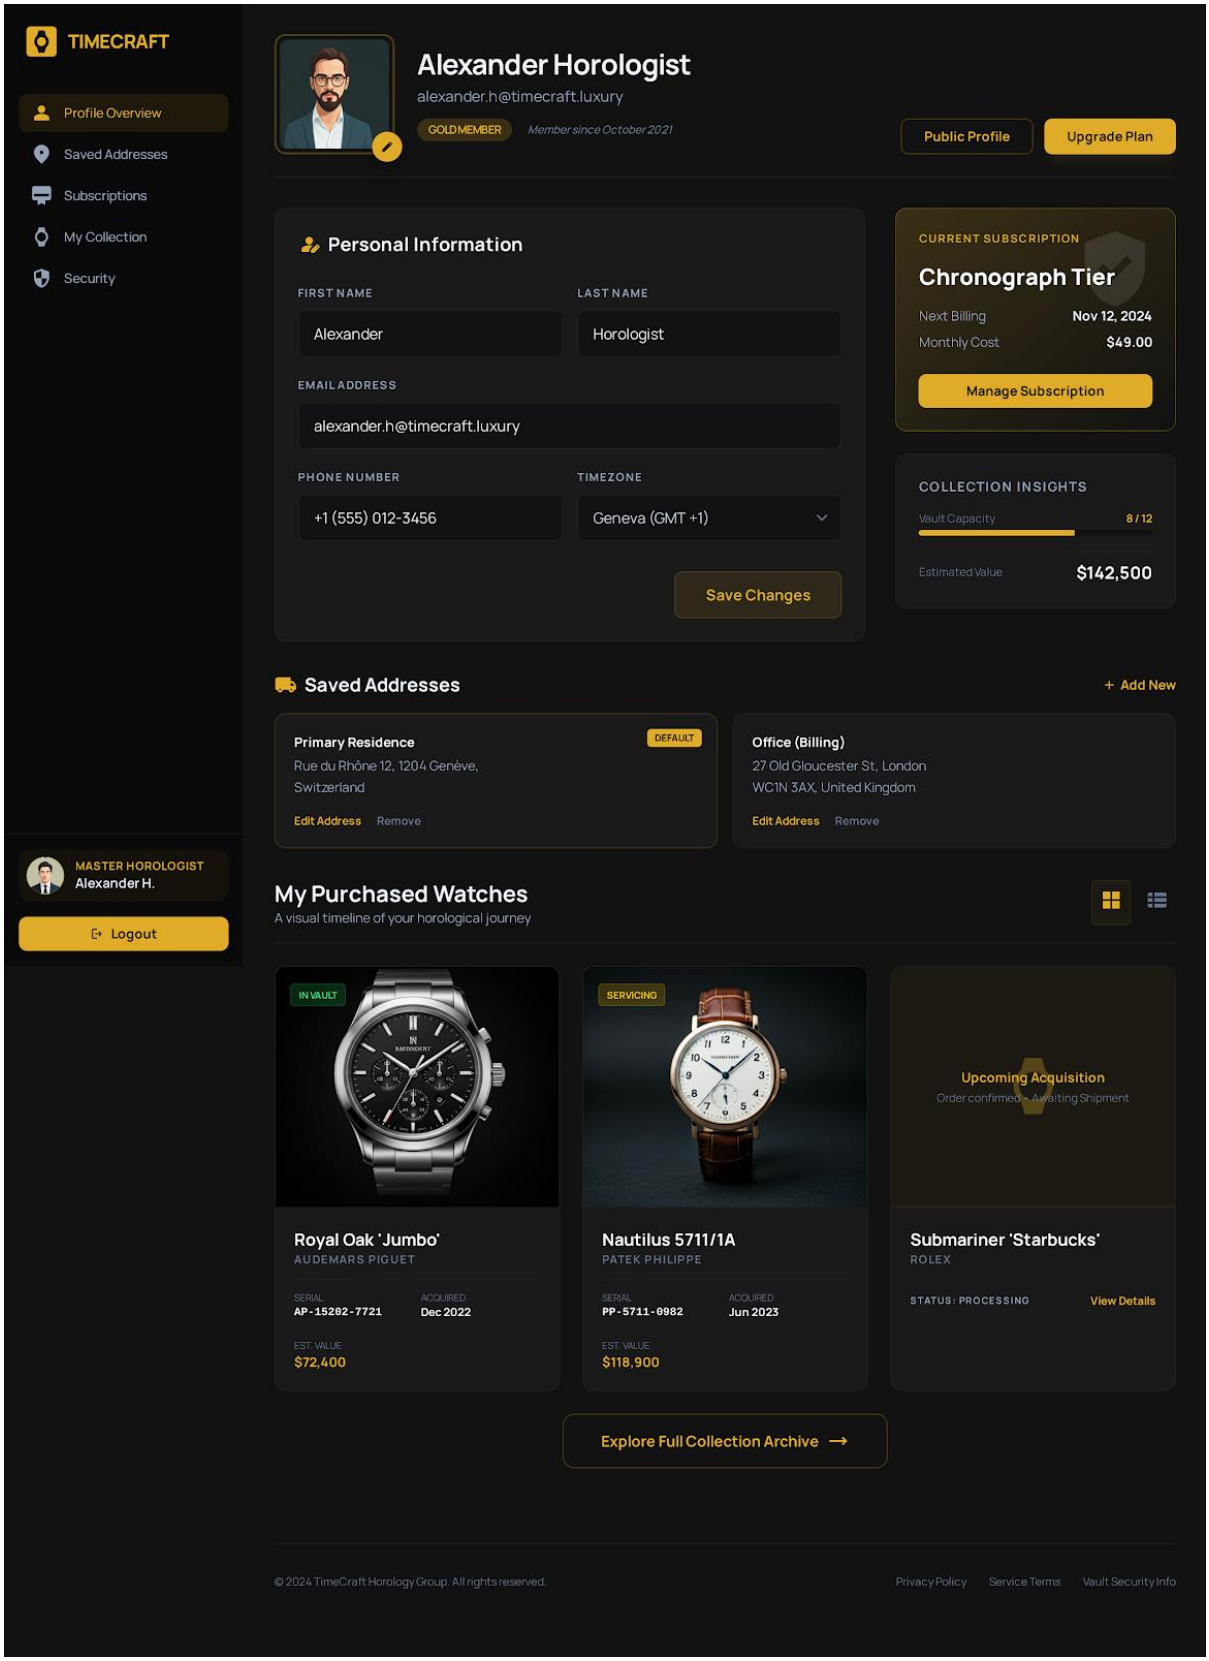
Payment Success Page



Description

This screen confirms that the user’s payment has been successfully processed. It displays order details, transaction reference, delivery estimate, and total amount paid. Users can download the invoice or navigate to their watch dashboard for further actions. A confirmation message reassures users that their order is being prepared. The interface reinforces trust and completion of the purchase process.

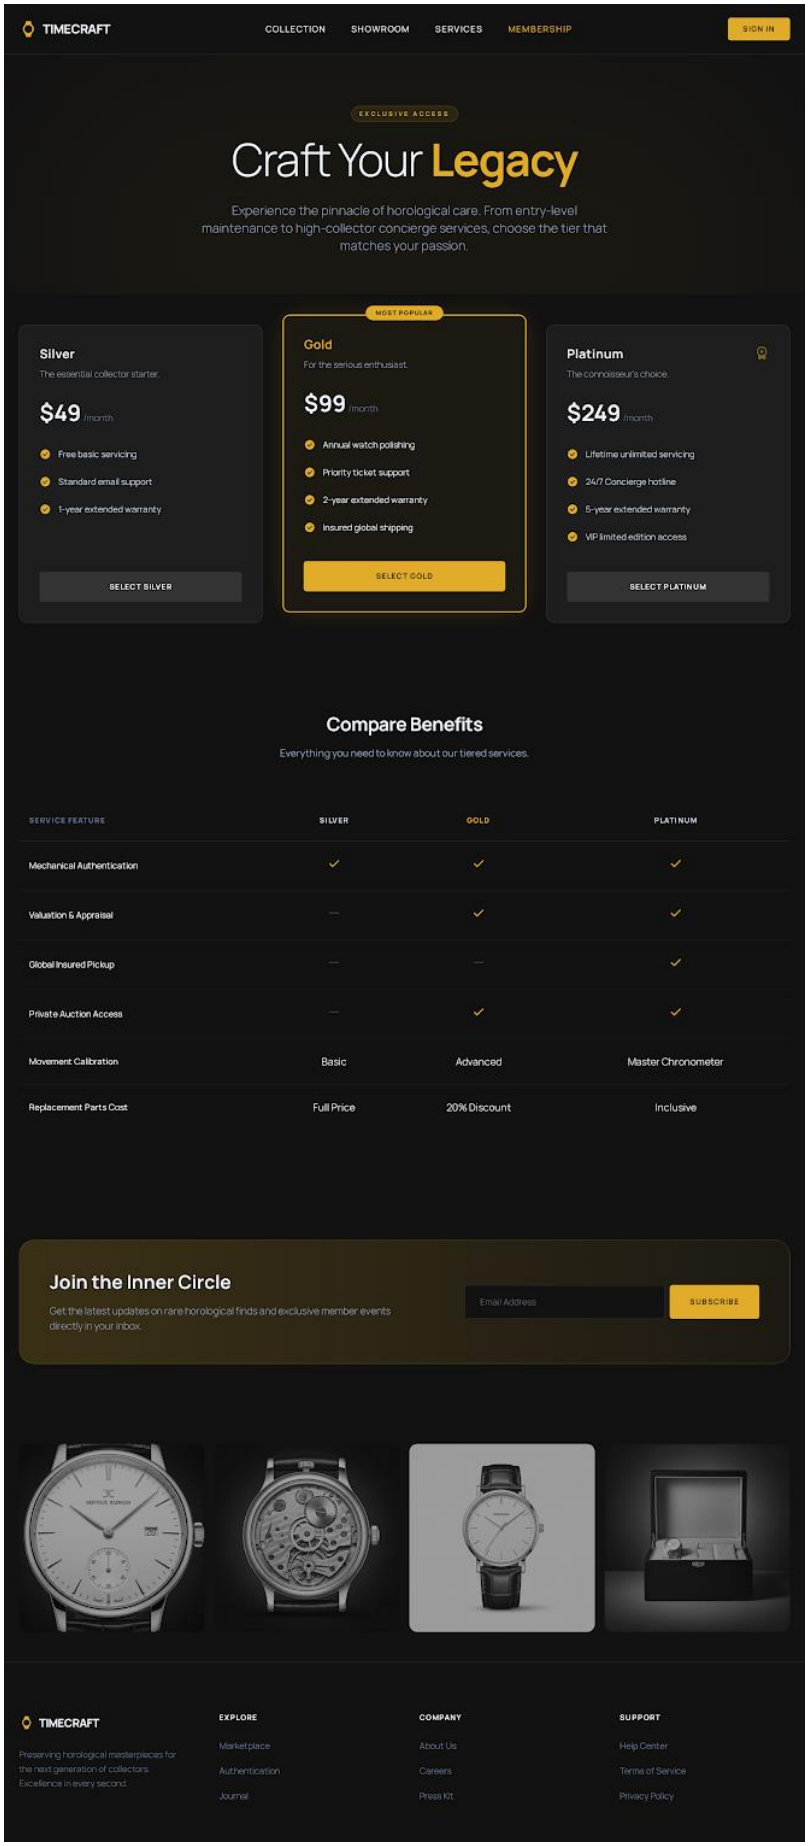
User Profile Page



User Profile Page – Description

This screen allows users to manage their personal information, saved addresses, and account settings. It displays subscription details, membership status, and collection insights in a structured dashboard view. Users can update profile details, manage subscriptions, and track purchased watches. The interface provides a centralized overview of account activity and ownership history. The design ensures easy navigation while maintaining a premium user experience.

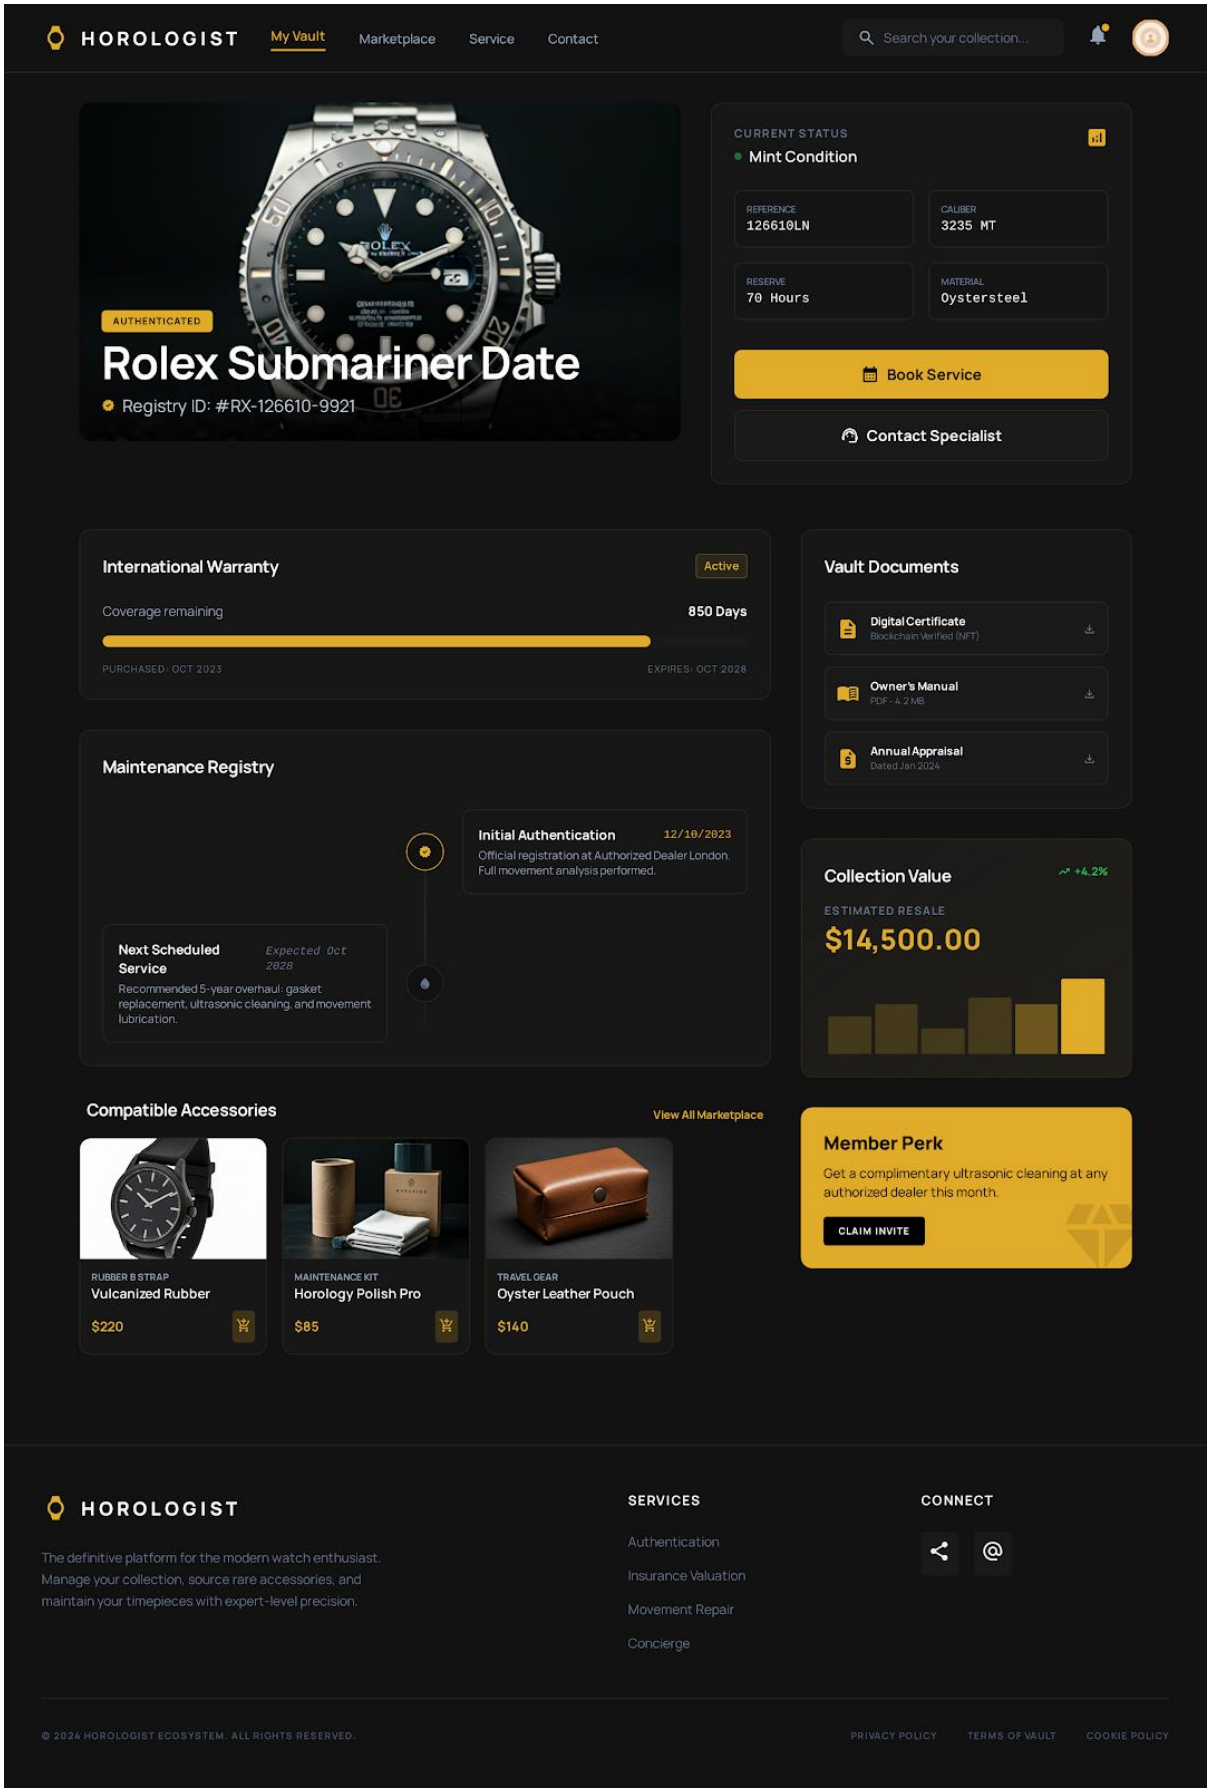
Subscription_plans page



Subscription Plan Page – Description

This screen presents the available membership and service subscription plans offered by TimeCraft. Users can compare tiers such as Silver, Gold, and Platinum based on pricing and included benefits. A detailed comparison table highlights service features across plans. The page enables users to select and subscribe to a plan suited to their needs. The design emphasizes clarity, value differentiation, and premium brand positioning.

Watch Ecosystem Dashboard Page



Watch Ecosystem Dashboard – Description

This screen provides a dedicated dashboard for an individual watch owned by the user. It displays authentication details, warranty status, maintenance history, and service schedules. Users can book servicing, access vault documents, and monitor collection value. Compatible accessories and membership perks are also highlighted. The dashboard offers a comprehensive lifecycle view of the watch within the ecosystem.
